

Rapid Diagnostic

Improvement begins with understanding how work is truly performed. The Rapid Diagnostic delivers structured insight by learning directly from operators and leaders, without disrupting production.

CLARITY ACROSS YOUR OPERATIONS

When performance plateaus or priorities compete, focus can drift. Dashboards show outcomes but rarely expose the behaviors, routines, and constraints shaping them.

Built from observation, dialogue, and real production routines, the Rapid Diagnostic identifies where your system is strongest and where it can evolve.

Manufacturing complexity is rising.

Multiple product mixes, labor variability, and supply instability make alignment harder than ever.

Improvement efforts stall.

Initiatives lose momentum without reinforcement or operator engagement.

Leaders lack real-time visibility.

Expectations and day-to-day execution fall out of alignment.

Resources are limited.

Sites must focus where impact is highest, without long-term consulting commitments.

A STRUCTURED, END-TO-END VIEW

A comprehensive view of how your system truly performs, not just how it is designed. During the two-day diagnostic, your site is evaluated across seven operational pillars:

Change

Sustained adoption and aligned execution

People

Confident leaders and capable teams

Safety

Proactive ownership and reduced risk

Quality

Reliable standards and consistent output

Delivery

Stable flow and predictable performance

Cost

Efficient operations and controlled spend

Digitalization

Connected data and informed decisions

FROM INSIGHT TO ACTION IN TWO DAYS

A focused operational assessment grounded in real work. The Rapid Diagnostic partners with operators and leaders to surface what truly drives performance.

DAY 1

Rapid Assessment & Prioritization

- Rapid operator and leadership assessment
- On-floor observation and focused interviews
- Identification of the highest-impact pillar
- Recognition of standout practices driving performance

DAY 2

Insight & Roadmap

- Evidence review with operators and leaders
- Clear view of expectation vs. daily reality gaps
- Prioritized 90-day improvement roadmap
- Recommended next steps across all seven pillars

CLEAR PRIORITIES. PRACTICAL NEXT STEPS.

- Comprehensive assessment across all seven pillars
- Live visualization dashboard of interview and assessment themes
- Prioritized 90-day improvement roadmap
- Full access to Zinata's playbooks, templates, and tools

Built for sites seeking to accelerate improvement, strengthen alignment, establish sustainable routines, and focus limited resources with confidence.

BUILT DIFFERENTLY. DELIVERED DIFFERENTLY.

Curiosity-driven

We learn from your processes

Strength-focused

Elevate what already works

Full transparency

Every recommendation shared openly

Operator-grounded

Built from real work, not theory

Efficient by design

Progress without disruption

Experienced practitioners

Deep operational expertise

LET'S TALK
